

JUMPING JACK

Use a photocopier to enlarge the image and transfer it on to card. Colour it in and cut it out. Make small holes using a pencil and blue tac on all the points marked with a circle on the template (14 altogether). Loosely tie the arms and legs together with string. Attach the arms and legs to the body using split pins. Tie a long length of string to both bits of string joining the arms and legs and have it dangling down between his legs (see the diagram). Hold Jack by his hat, pull the string and watch him jump up and down!
