

Exploring Skylines

Architecture Gallery Extension Activity

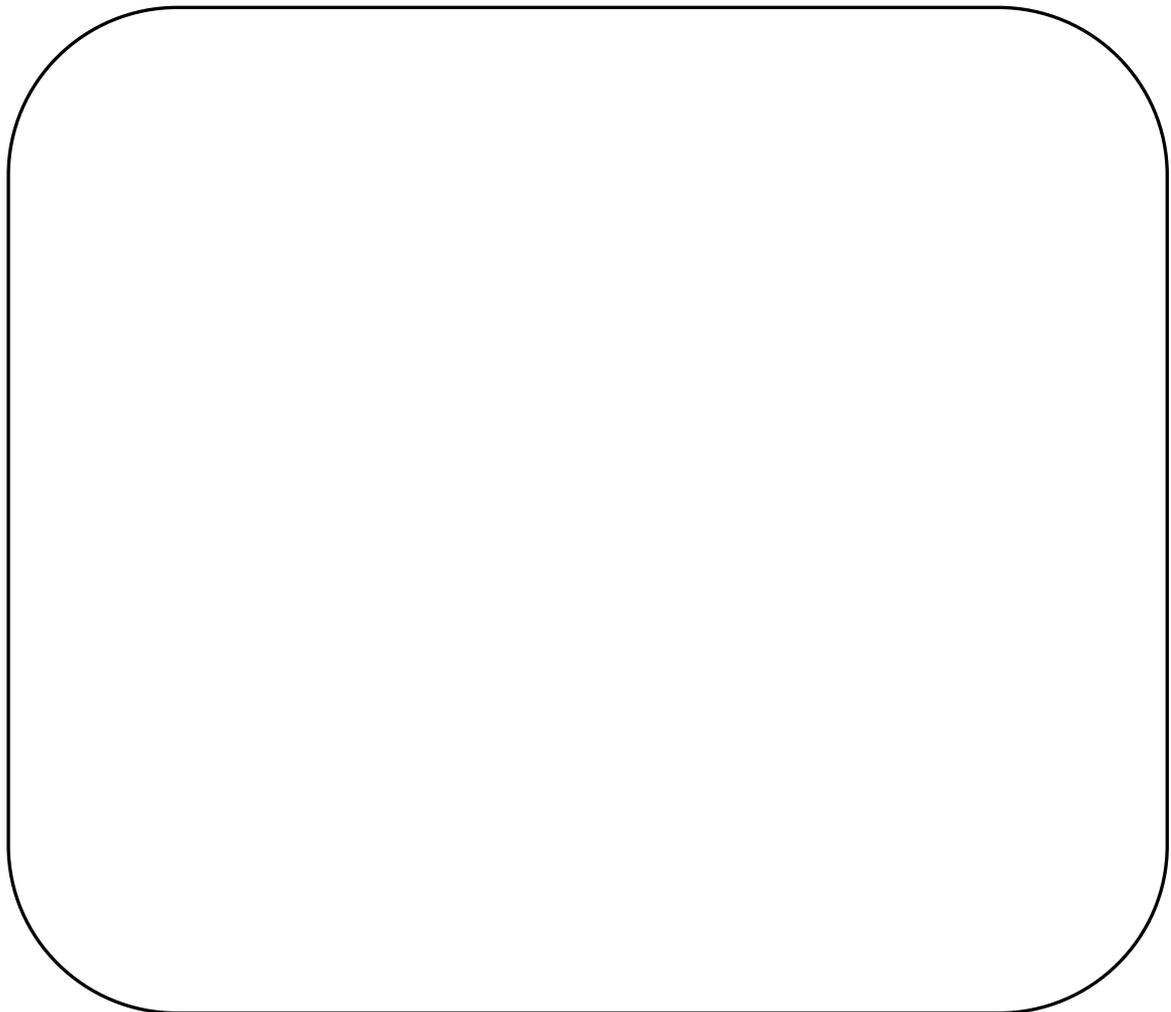

Research Challenge: Choose one model displayed in the Architecture gallery. What can you find out about it?

What is this building or structure used for? Why was it made?

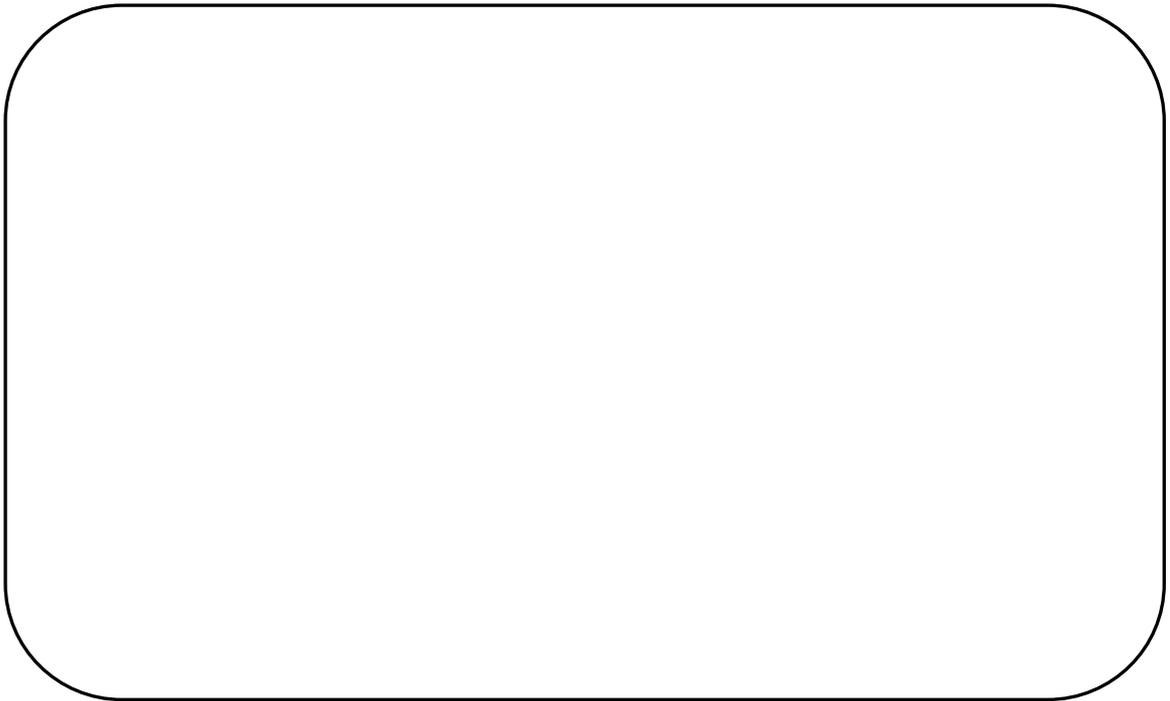

Who designed this building and in what year? Where is it?

What materials is the model made out of?

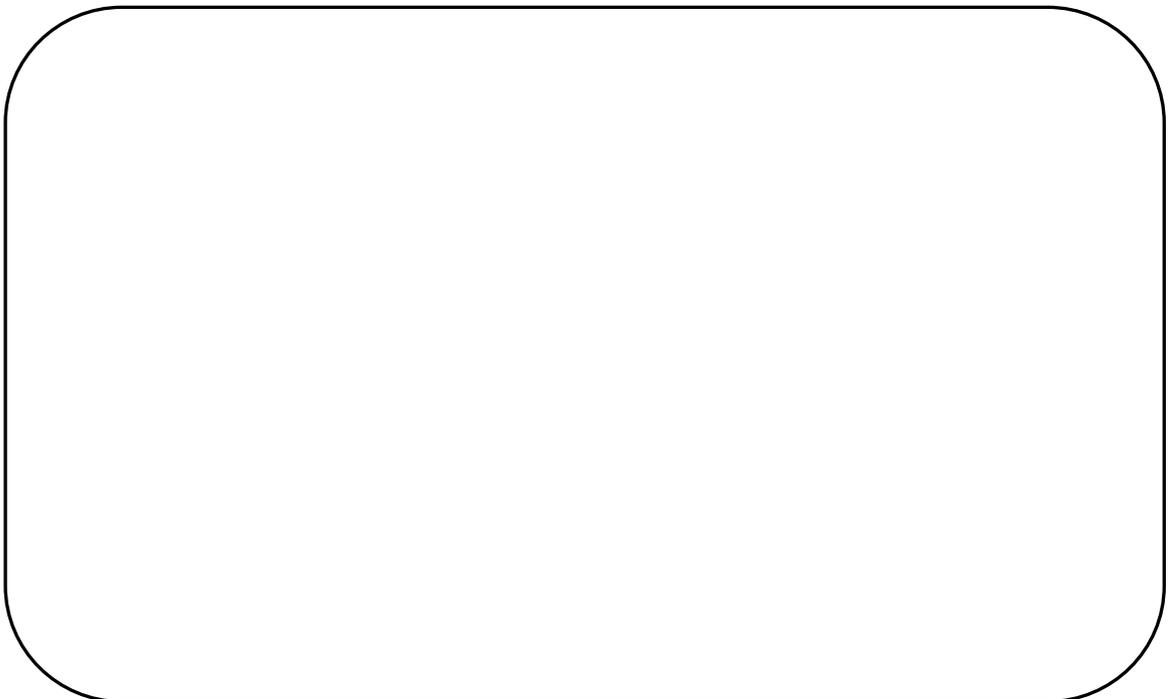

Does it have any interesting decoration, details or shapes? Draw some of them in your sketchbook, or on this sheet.

Which is the best viewpoint (front, back or side) and why? Draw it.

Does it have an interesting outline? Draw it.

Have you seen a building like this before?
