

Make an Origami House

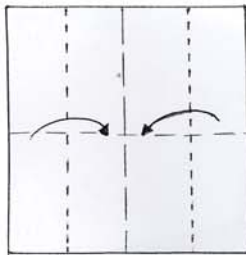

You will need: square sheet of paper & scissors

1.

Fold your paper in half, then open it out, turn it round and fold in half again. Open it up so that you have creases in the shape of a cross.

2.

Fold the edges lengthways to the middle and repeat on the other side so that your paper looks like figure 3.

3.

Your paper should now look like this.

4.

Open your paper up again so that it looks like this .

5.

Fold the left side over so that your paper looks like this .

6.

Open the paper up again and do the same with the right side of the paper like this.

7.

Open out your paper so that it looks like this and has diagonal creases.

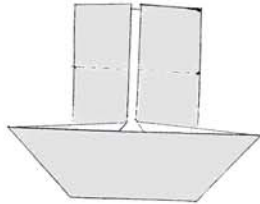

8.

Middle crease

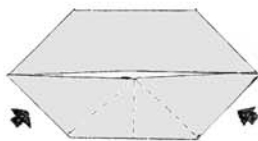

Fold top edge down and push corners outwards, the creases you have already made will help. Your paper should now look like a house.

9.

Turn the paper upside down so it looks like this.

10.

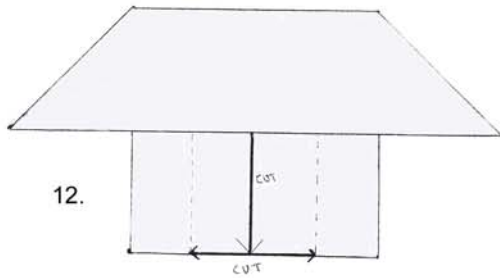

Repeat instructions from point 8. Your house should now look like this.

11.

Tuck the right and left bottom flaps behind themselves so that they are not visible. Now your house should look like this.

12.

Follow the diagram and cut the lines with your scissors. Be sure to cut only one layer. Fold the flaps back to open your house doors.

Congratulations Your Origami House is now complete.
