

Creepy Crawly Creations

Inspired by the collection

You can ride on this Bumblebee Wheelybug. Maybe it could help you in your search for insects?

This mechanical beetle crawls along the ground. Don't let it get away from you!

These sunglasses were made in the 1960s. Maybe they could help you blend in with the bugs?

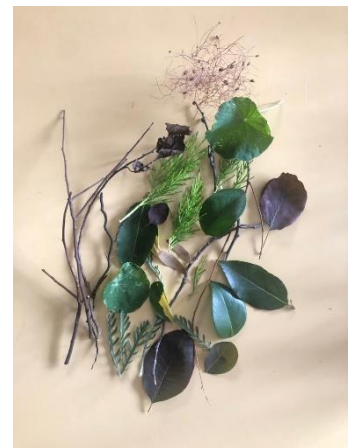

You will need:

- Natural objects (leaves, stones, seeds, twigs etc.)
- Sellotape and/or glue
- Pens or paint

Remember to wash or sanitise your hands after collecting your natural objects.

Only collect natural objects that have fallen onto the floor. We don't pick things from the plants!

1. Go to your garden or local park. Collect any interesting natural objects you can find.

2. Keep an eye out for any creepy crawlies that might inspire your creations.

3. Use your natural materials to make different creepy crawlies. You can get creative with paint and pens to add some colour.
